A little about me

I'm excited about web development, peer to peer web and decentralization! I am very much into building clean UI for the end user & finding the best ways possible to engage customers. I'm also a free software enthusiast.

Skills

- Web Technologies (like HTML5, CSS3, Sass, PostCSS, Pug/Jade)
 - Javascript (ES6+), Typescript
 - Frontend frameworks (ReactJS, VueJS etc)
 - Libraries (CSS-in-JS, Redux, Jest etc)
 - Backend frameworks & libraries (Koa, Express, GraphQL, Apollo)
 - Build tools (Gulp, Webpack, Parcel etc)
-

Work Experience

Fullstack Developer

Oyez.fr (January 2018 – December 2019)

ECMAScript/Javascript, GraphQL, NodeJS, Elasticsearch, GCP(pubsub), KoaJS, ReactJS, Redux, Responsive Web Design

- Worked with a team of more than a dozen people who worked simultaneously across various microservices & timezones
- Revamped a product website's frontend with a completely new and cleaner UI
- Helped solve critical bugs in the frontend.
- Reviewed and contributed to internal libraries.
- Design and modularise complex components
- Created scripts and projects on the backend to orchestrate data flow between various microservices

Fullstack Developer

fruitstone (December 2017)

Javascript, NodeJS, Babel(ES6+), MySQL, ReactJS, Redux, Responsive Web Design, ExpressJS

- Built front end functionality for an eCommerce website using ReactJS, Redux and React Router.
- Implemented API endpoints for the back end.
- Learned mySQL

Projects

Monoprix(<https://www.monoprix.fr/courses-en-ligne>)

ECMAScript/Javascript, GraphQL (Apollo Client & Server), NodeJS, MongoDB, Elasticsearch, GCP(pubsub), KoaJS, Mongoose, ReactJS, Redux, Responsive Web Design

A popular e-commerce website in France

Modern

Pomodoro(<https://gitlab.com/buoyantair/modern-pomodoro>, <http://buoyantair.gitlab.io/modern-pomodoro/>)

HTML, CSS, Javascript, Service Workers, PWA, Local Storage

A vanilla javascript based pomodoro app that helps me manage my time

graphblog(<https://gitlab.com/buoyantair/graphblog>)

ReactJS, React Router, Apollo Client, GraphQL, Webpack, Babel (ES6), Express, MongoDB, Mongoose

A simple blog system with markdown support, I learnt a lot about graphql while building this.

Mr. Plex (<https://github.com/coderplex/Mr.Plex>)

Typescript, Discord API

A chat bot I made for a local community
